

## CLAIMS

**What is claimed is:**

1. ~~A method of stereoscopic image process on a networked computer system:~~

loading a first image;

loading a second image;

color matching said first and second image;

stereoscopically aligning said first and ~~second~~ images;

display a stereoscopic image of said first and second images.

2. A stereoscopic metamorphosis process for converting one image into a stereoscopic image comprising:

retrieving a 2D image;

loading said 2D image;

selecting and applying a depth metamorphosis processor;

displaying said ~~2D~~ image as a 3D image;

applying cross talk reductions algorithms;

modifying color and contrast attributes; and

displaying said 3D image.
